

# VASCULAR IS ONE OF THE FASTEST GROWING HOSPITAL SERVICE LINES

## Vascular is one of the Fastest Growing Hospital Service Lines

## Endovascular Procedures will Drive the Growth

# THE MAGELLAN™ ROBOTIC SYSTEM: DRIVING ENDOVASCULAR EVOLUTION

## Advance Procedures with Robotic Control

The precision and stability of the Magellan Robotic System offers the potential to:

- Enable advanced endovascular procedures<sup>8</sup>
- Improve the reliability and effectiveness of therapy delivery<sup>9</sup>
- Reduce the risk of emboli and procedure-related stroke<sup>10</sup>
- Reduce physician and staff radiation exposure<sup>11</sup>

Robotic Arm at Patient Beside  
Controls Magellan robotic catheters  
and off-the-shelf guide wires.

## Shift the Economics

A Magellan™ Robotic Program has the potential to:

### Drive top line revenue

- Incremental patient growth
- Improve payer mix

### Increase efficiencies through procedure time predictability<sup>12</sup> to address:

- Case time overruns
- Overtime and resultant service costs

### Improve utilization rates<sup>12</sup>

- Capture additional case revenue

Physician Workstation:  
Away from Radiation Source

## Magellan Robotic System

Indications for Use: The Magellan<sup>TM</sup> Robotic System, Magellan Robotic Catheter and accessory components are intended to be used to facilitate navigation to anatomical targets in the peripheral vasculature and subsequently provide a conduit for manual placement of therapeutic devices

## Important Safety Information

As with most invasive procedures, use of the Magellan Robotic System is not without risk. Serious adverse events, some of which can be fatal, may occur, including vascular damage, embolization and stroke. Other potential risks inherent to procedures such as this include loss of limb, catheter entrapment, infection and access site complications (e.g. hematoma) which may require additional surgery. Do not use the system without understanding the instructions for use. For information regarding, contraindications, warnings, precautions, adverse events, and methods of use, please see package inserts included with the product. Rx Only Rev:1012
